

HR Management

HYDRA X
BUILD YOUR FACTORY SMART

Is your **workforce** always ready for action? ...
and does everything else click into place for
your employees?

Motivation

"We have had our own **stand-alone** solution to **collect time** for a long time, which is not **compatible** with almost any software. New **interfaces** are required continually."

"Doing simple things like requesting **leave** is like a major project for us. Leave requests on **paper**, lots of **phone calls** and **coordination** - it's a pain!"

"Our employees are **paid according to their performance**. Can't we use **real-time data** from **manufacturing** for that?"

"We require special **access authorization** for certain areas. Do I need to introduce **another software** for this?"

Your Issue

- Manage your employees easily and transparently.
- Collect working times in the blink of an eye and digitally map everyday processes such as applying for leave.
- Use actual data from production for a comprehensible remuneration.
- Secure access points with a digital access control system.

Our Solution

With the mApps of the HYDRA X category HR Management, you can ...

- ... collect working & break times systematically.
- ... make your absence management efficient.
- ... manage your employees' time accounts and support payroll.
- ... ensure performance-based premium calculation based on reliable data.
- ... control and document access to sensitive areas.
